DETAILED ACTION

Restart Period

1. Due to the incomplete first sentence of item 2 of the previous Office action mailed 12/7/05, the time for reply has been restarted.

Ex parte Quayle

2. This application is in condition for allowance except for the following formal matters:

Drawings

3. The drawings are objected to because the sectional cross-hatching of reference numerals 126 (Figure 1), 113 (Figures 1 and 2), and 114 (Figures 1 and 2) is incorrect. See MPEP §608.02. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date

of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- 4. The abstract of the disclosure is objected to because of the inclusion of legal phraseology, such as "comprising" (page 49, line 2). Correction is required. See MPEP § 608.01(b).
- 5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim

6. Claim 13 contain the following minor informality: line 2, ";" should be "." because it is the end of the sentence.

Prosecution on the merits is closed in accordance with the practice under Exparte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

Application/Control Number: 10/782,816 Page 4

Art Unit: 2852

Allowable Subject Matter

7. Claims 1-18 are allowable over the prior art of record.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest a surface layer having a surface static friction coefficient of 0.06 or less with common paper at 100°C.

Other Prior Art

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Uehara et al. (US Pat. No. 5,485,259) discloses a fixing device comprising a static friction coefficient with respect to a recording sheet on a heating roller being 0.68 on one hand, and a static friction coefficient with respect to the recording sheet on the solid elastic member being 0.12 on the other.

Takenaka et al. (US Pat. Pub. No. US 2003/0063934 A1) discloses a fixing device comprising a pure PTEF layer having static friction coefficient being 0.05-0.08.

Ogiso et al. (US Pat. Pub. No. US 2004/0057759 A1) discloses Figure 11 showing different static friction coefficients with different materials.

Chen et al. (US Pat. No. 6,721,529 B2) discloses a fixing device comprising an outermost layer of a donor roll having a static coefficient value of less than about 0.8, as determined at room temperature.

Art Unit: 2852

Sugawa et al. (JP 08-323937 A) discloses a protective layer formed of a polyolefin-base film having a static friction coefficient at 110°C being equal to or less than 1.0.

Komuro et al. (JP 2003-140486 A) discloses a fixing device comprising a static friction coefficient of a surface layer to a coated paper being 0.45 or less.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sophia S. Chen whose telephone number is (571) 272-2133. The examiner can normally be reached on M-F (7:00-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on (571) 272-2136. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
